

HOUSING SOLUTIONS

Tropicalized Construction

Properties

- + Houses designed to last more than three hundred years
- + Zero Maintenance
- + Green Constructions 100% reusable
- + High Efficiency Saving "Energy"
- + Earthquake safe construction
- + Hurricane Wind resistant up to 200 kilometers per hour
- + Shock resistant
- + Immune to bacteria, fungi, corrosion, termites and others.
- + UV Resistant
They need never to be painted
- + And much more...!

**COMPOSITE ENGINEERED
HOUSING SOLUTIONS**

Composite Building System

Our Team

Next Generation Constructive Systems, “NGCS”, is a business group, created to bring the marketing and use of highly engineered systems of construction to the next level on an affordable, practical and simple way, using design optimization as a key tool to achieve self-sustaining, reliable, durable and functional products.

Taking your ideas from concept To design to the final result.

Our Portfolio

1 Bedroom House 21.19 M2
2 Bedroom House 41.8 M2
3 Bedroom House 52.24 M2
4 Bedroom House 95.2 M2

Classrooms from: (62.71 m2)

Clinics and laboratories

Warehouses

Mobile Modules for temporary services

Bulletproof police stations
Bulletproof sheriff stations

Aircraft Hangars
Industrial Complexes

High security Prisons & Jails

Initially focused on the areas of civil construction, our group has consolidated the experience of over 40 years reached through the work in various European and American countries of many of our engineers and technicians in these fields leading to develop a new concept in the design that allows us to use the existing materials in all their technical variants on a harmonious and rational way, working on spaces, volumes and structures optimization to reduce the final construction costs.

MAKING YOUR PROJECT AN EFFICIENT ONE.
